GUIDE OF MANUAL

- Please read the following instructions carefully and good maintenance can extend the service life.
- Keep this instruction for future reference.
- The manual can't cover all the details of assembly; if you need more information, please contact the customer service.

WARNING

- Take the canopy out of the box carefully and place on dry and even surface(sand, grass, or hard surface)
- Please have at least 3 people helping with the assembly. In order to avoid the damage of steel pole. DO NOT ATTEMPT TO ASSEMBLE TENT ALONE BECAUSE THIS COULD PUT UNNECESSARY STRESS ON THE LEGS AND THEY COULD GET DAMAGED IF THEY ARE NOT PULLED APART IN TANDEM.
- Secure tent in windy conditions by using the rope that is located on each side of the canopy and hammering stakes into the ground to balance the sides of tent. If the canopy is placed on a hard surface, secure the 4 poles with bricks or sand bags to weigh the canopy down.

- Store your canopy/tent in a cool dry place when not in use.
